## Polycom IP 601 Phone

## Using the IP Phone

### Place a Call:

- 1) Pick up the handset, press the  soft key, or press the  key.
- 2) Enter the number you wish to call, and press the  or  soft key.

NOTE: You may optionally dial local or toll calls using 10 digits.

### Put a Call on Hold:

- 1) During an active call, press the  soft key, or press the  button.
- 2) To resume the call, press the  soft key, or press the  button.

### Consultative Transfer (announce the call before transferring):

- 1) During an active call, press the  soft key. This will put the caller on hold.
- 2) Enter the number to which you wish to transfer the call and press the  soft key.
- 3) When the Transfer party picks up you may begin your consultation. The first party will still be on hold.
- 4) When you are done with your consult, press the  soft key.
- 5) Call will immediately transfer and you may hang up.

### Blind Transfer (transfer without announcement):

- 1) During an active call, press the  soft key. This will put the caller on hold.
- 2) Press the  soft key.
- 3) Enter the number to which you wish to transfer the call and press the  soft key.

- 4) Call will immediately transfer and you may hang up.

### Create a 3-Way Conference Call:

- 1) During an active call, press the  soft key. This will place the current caller on hold.
- 2) Dial the number of the party you wish to add to the call and press the  soft key.
- 3) When the party answers, press the  soft key. All parties will now be in conference.

### Split a 3-Way Conference Call (disconnect conference and place the two other parties on-hold):

- 1) During the conference, press the  soft key.
- 2) The two parties will be put on-hold on separate lines.
- 3) Using *Display Control* keys to navigate to the desired party, you may then press  to re-establish individual call.

### Reject a Call and Let Voice Messaging Answer:

- 1) When an incoming call arrives that you do not wish to answer, press the  soft key.
- 2) Your phone will stop ringing and the caller will be sent to your voice messaging.

Note: If *Simultaneous Ring* is active, call will continue to ring on other designated line(s).

### Answer a Call on Your Second Line:

- 1) While the first call is active, and the second call begins ringing, use the *Display Control* keys to select the incoming call.

- 2) Press the **Answer** soft key to answer the call; this places the first call on hold.
- 3) To reactivate the first call, use the *Display Control* keys to select the first call and press the **Resume** soft key, this places the active (second) call on hold and reconnects the first call.
- 4) Using the *Display Control* keys, you may navigate between active calls as you wish.
- 5) You may disconnect a call at any time by pressing **End Call** soft key.

Note: If multiple calls are on hold, an indicator will display the number of held calls (ex.: 2/3).

## Change the Default Ring Tone:

- 1) Press the **Menu** button.
- 2) Using the *Display Control* keys, select *Settings* and then the *Basic* menu options.
- 3) Select *Ring Type*.
- 4) Use the *Display Control* keys to scroll through the different ring tones. Press **Play** to hear how the ringers sound.
- 5) Press the **Select** soft key to select the current highlighted ring tone.
- 6) Press **Exit** key to exit programming.

## View Missed, Received and Placed Calls:

- 1) Press the **Menu** button.
- 2) Select *Features* from the list of menu options.
- 3) Select *Call Lists* from the list of menu options.
- 4) Using the *Display Control* keys, scroll to Missed, Received or Placed calls.
- 5) Press the **Select** soft key to select a category.

- 6) Using the *Display Control* keys, scroll through the calls.

- 7) You may call the party by using the **Dial** soft key or select another option.
- 8) The call logs will be reset if the phone is rebooted.
